

AvenCell

Based on our deep science and focused on patients in need, we develop next generation immunotherapies for hard-to-treat cancers.

AvenCell is a biopharmaceutical company focused on the discovery, development, manufacturing and commercialization of next generation immunotherapies for patients in underserved cancer indications.

We are looking for a

Scientist / In vivo Pharmacology and Immuno-oncology (m/f/d)

to join the AvenCell's R&D department on-site in Dresden, Germany.

Your Tasks and Responsibilities:

- Hands-on laboratory research on AvenCell's proprietary switchable CAR-T cell technology
- Conduct in vivo pharmacology research to understand the pharmacokinetics and pharmacodynamics of CAR-T cells and recombinant antibodies in context of hematologic malignancies and solid tumors
- Implementation, optimization and troubleshooting of in vivo protocols to analyze T cells responses in different mouse models
- Self-dependent analysis, review, interpretation, and presentation of in vivo and ex vivo data
- Ensuring accurate records of experimental results and methods applied
- Technical guidance of laboratory staff and junior scientists
- Communicate and coordinate effectively between research teams to achieve departmental goals

Your Profile:

- PhD in Life Sciences with a strong background in immunotherapies, postdoctoral academic or industrial experience is desirable
- Experience in designing in vivo studies and strong hands-on mentality in conducting immunology mouse models (in this context, a FELASA B certificate is desired)
- Expertise in multicolor flow cytometry, histology, and familiarity with in vitro and in vivo assays in context of T cell responses is necessary, knowledge of the development of CAR-T cells is a plus
- Excellent interpersonal and organizational skills as well as a problem-solving mindset with a strong attention to details
- Ability to manage multiple studies in parallel and able to adhere to timelines
- Very good oral and written knowledge of English, German is an advantage

We Offer:

- Full-time employment relationship
- Exciting career opportunities in an international expanding company
- Benefits: Job ticket, parking lot and company fitness
- An inspiring and family-friendly environment with enthusiastic colleagues and development opportunities
- Attractive salary with additional bonus payments
- 30 vacation days and flexible working hours

Interested? Please apply directly via our [online system](#) including your cover letter, resume, and references.

We look forward to receiving your application!
